

Six Chuter P3 Lite

The All New P3 Lite Powered Parachute Kit by Six Chuter International LLC

The P3 Lite is the latest addition to the Six Chuter fleet of Light Sport and Ultralight Powered Parachutes. The P3 Lite has been designed to make flying simpler, safer, more fun and less expensive. The airframe is light, strong and easily portable. The P3 Lite meets FAA standards for ultralight powered parachutes and therefore requires no pilot's license to fly! And it is a **real powered parachute** not a para-glider or powered para-glider. Powered Parachutes offer the easiest and safest way to fly with the least amount of FAA involvement. Offered in kit form for \$12,995 the aircraft can be built by the average builder in

less than a week. And the price includes \$500 credit towards your training!
