

Paragon

Special Light Sport or Experimental Light Sport Powered Parachute

The Six Chuter Paragon is our top of the line powered parachute. Equipped with the Rotax 912 (four stroke) engine it is one of the best performing powered parachutes in the world. The standard kit comes with everything required to get you airborne in one of the safest and most economical ways to fly. The Six Chuter Paragon is available in three different airframe configurations including: Paragon XLs with No Frontal Bars, Paragon XLs with Optional Frontal Bars and the Paragon Hdlx with the "Halo" Outriggers and Frontal Bars. The Six Chuter Legend is an FAA Light Sport aircraft available as full factory assembled Special Light Sport or assembled

or in kit form eligible for certification as Experimental Light Sport.
